Experience

Exaptive
Lead Software Developer, *March* 2023 - PRESENT, Oklahoma City, OK
- Developed data model for a graph network in Neo4j and ran community detection algorithms on the graph. The project aims to compare the performance of community detection algorithms in Neo4j's Graph Data Science to those in the Python package networkX, providing a cost analysis for the business.

Nourished Coaching & Consulting / Nourished Food Bar / Owner-Operator
Lead Software Developer, 2012 - *Feb* 2023, Oklahoma City, OK
- Implemented and maintained an online sales system, integrating APIs and utilizing HTML, CSS, JavaScript, starting in 2013.
- Developed user experience across multiple domains, including website, online ordering, and in-person interactions leading to 5 star reviews and sales growth.
- Designed a streamlined recipe data structure for internal use, ensuring efficient storage and retrieval of information, leading to increased productive output of the team, fewer mistakes made, and a more consistent product.
- Lead the development of internal tools for recipe costing, scaling, and daily production management, which directly led to an increase in sales and profit.

105degrees | MatthewKenney / Sous Chef
Raw Food, Plant-Based Culinary Academy & Restaurant, 2010 - 2012, Oklahoma City, OK

- Trained and graduated from the raw food, plant-based culinary academy, gaining comprehensive knowledge of culinary techniques and practices.
- Advanced career within the restaurant, mastering various roles and responsibilities, while cultivating expertise in kitchen management, team collaboration, and exceptional customer service.
- Developed and standardized kitchen procedures, implementing industry-leading best practices to enhance efficiency and ensure consistent quality.
- Conducted comprehensive staff training sessions to ensure seamless implementation of standardized procedures.
- Strategically controlled food costs by closely monitoring food preparation and waste, meticulously costing out recipes, and providing detailed reports to the general manager.
- Implemented effective inventory management practices, setting optimal par levels and regularly reporting inventory status to the general manager.

Oklahoma Sports Science and Orthopaedics / EMR Development
Electronic Medical Records (EMR) Developer, 2006 - 2009, Oklahoma City, OK

- Led the transition from paper-based records to electronic medical records (EMR) system, driving the team towards a paperless environment.
- Provided comprehensive training and support to staff members to facilitate a smooth adoption of the EMR system. Served as preceptor to clinical staff and liaison between clinic and IT staff.
- Worked closely with clinical staff to design, optimize and support the EMR system.

Education

OKCoders 2023 Cohort / Full Stack Developer / 2023, Oklahoma City, OK

The Real Deal Collective 2022 Cohort / 2022, Oklahoma City, OK

Institute for Integrative Nutrition / Health Coach / 2012 - 2013, New York, NY

105degrees Academy / Plant-Based Chef / 2010, Oklahoma City, OK

University of Oklahoma / B.S. Biomedical Science / 2001 - 2005, Norman, OK

Certifications

Backend Development and APIs
Javascript Algorithms and Data Structures
Responsive Web Design
Building Neo4j applications with python
Cypher fundamentals
Graph Data Modeling fundamentals
Neo4j fundamentals

Skills

Development:
Solid knowledge of JavaScript, React.js, Next.js, Node.js, server vs client components vs plain html and css
Proficient understanding of versioning tools, such as GIT
Strong knowledge of asynchronous and Promise patterns
Knowledge of unit testing patterns and practices
Knowledge of SDLC and CI / CD and cloud platforms - deploying to Vercel's cloud
Experience with Python frameworks – Django, Flask
Familiar with system architecture
Technical Proficiencies:
Languages
JavaScript, Typescript, Python, PHP, HTML, CSS, CYPHER
Frameworks / Libraries
React.js, Redux, Express.js, Next.js, Django, Material UI, Tailwind CSS
Paradigms
Continuous Integration(CI), Continuous Delivery(CD), Kanban, Scrum, Agile Software Development, Continuous Deployment, Object-Oriented Design(OOD), REST APIs, Google Maps, React, Stripe, Node.js, jQuery
Tools
Git, Webpack, Terminal, Visual Studio Code, Adobe Creative Suite, Vim, Emacs, Postman
Storage
JSON, OpenXML, MongoDB PostgreSQL, MySQL, SQLite, Graph Databases, Neo4j
